

CrossFlow™ Efficiency
Proprietary technology that directs air oscillation without articulating parts.

Versatile
Climate control adaptive with airflow-only, vapor or mist capabilities.

Durable
Strong weatherproof body, with fully enclosed system, designed to withstand the elements in any climate.

Portable
Easy to transport with its heavy-duty wheels and ability to tilt like a hand truck.

Introducing

VECTOR

The first smart mobile climate control system to revolutionize the science of heat mitigation through intelligent airflow.

100° of customizable oscillation
 Dimensional cooling of up to 25°
 Quiet delivery of 9,000 CFM at 59 dB

Atmosphere redefined.

Designed for commercial, industrial and residential spaces, Vector's GFI compatible system maintains a safe, cool and breathable environment while mitigating heat, airborne viruses, dust, mold, slip and fall accidents, and other health concerns.

Air delivery	9,000 CFM
Velocity	+40 mph
Power Usage	100-1000 W
Input Voltage	100-240 V
Utility Frequency	50/60 Hz
Speeds	Variable
Cooling capacity	Up to 25° (2,500-3,000 sq ft)
Water reservoir	15 G / 57 L
Noise Level	59 dB
